

Switching to a VoIP Phone System: Does it make sense?

- “I’m looking to replace my phone system”
- “I need people to easily work from home or the road”
- “Phones on my old PBX or key system are too costly and hard to find”
- “I require too many service calls from the phone guys”
- “My monthly bills are too high from Fairpoint, AT&T, Comcast, etc.”

Typical benefits of the VoIP phone service we support:

- No need for an expensive back end phone switch. No capital expenses!
- Phones can easily be plugged in at home office or use mobile app
- Phones are provided free with service
- No service call needed once set up properly. Toll free phone support included
- Unlimited calling included with monthly price

Phones That Evolve

Through Cytracom’s Evolve program, you get new, upgraded devices every 36 months. This guarantees you always have the latest firmware and hardware updates. Plus, it covers full warranties—so if anything happens before your upgrade, we fix or replace the phone for free.

No Contracts

Simplify your budget with predictable month-to-month plans. The Cytracom phone service, when sold and serviced by Certified Cytracom partners, does not require a long-term contractual commitment.

Local Support

We are available to help you configure, install, and manage your phone system. Then, Cytracom adds a free layer of care with US-based support engineers available 24x7 to troubleshoot and resolve any issues that may arise.

Brian Wheeler, Owner of Resolve Technology, has worked as a PBX/Key System technician, cabler, and call center consultant for large and small companies. He believes the Cytracom product fits many businesses.

Call 603-742-1118 for free assessment. If it doesn’t fit Brian won’t sell it!
